## Sliding Door Accessible Toilet Lock

Operation is simple from the outside, just a handle to slide the door open or closed, overcoming the problems related to positioning and avoiding conflict with the lock. The indicator release allows access in emergencies. Lift the lever inside to lock the door and use to slide the door open or closed.

The unique **JEFLOCK** sliding door accessible toilet lock comes in a complete set as shown in the photographs below. The Handle for the outside measures 510x19mm diameter (300mm c/c) with the bottom fixing at approximately 900mm above FFL, this not only aids operation by wheelchair users but also complies with minimum height recommendations of 1300mm to the top. The inside 19mm diameter lever handle is fitted at approximately 1000mm above FFL and complies with all new legislation and recommendations.

The **JEFLOCK** Sliding Door Accessible Toilet Lock is available in Satin or Polished Stainless Steel, Satin or Polished Brass, IBMA, Matt Black -RAL 9005, Dark Blue . RAL 5003. We can also powder coat to any RAL number, Please note, there is a paint set up charge for up to 4 sets.
